collagen alpha 1'(II) chain precursor - African clawed frog
Cispecies: Xenopus laevis (African clawed frog)
Cjoate: 16-Sep-1992 #sequence_revision 16-Sep-1992 #text_change 09-Jul-2004
CjAccession: A40333
R;Su, M.W.; Suzuki, H.R.; Bieker, J.J.; Solursh, M.; Ramirez, F.
Cell Biol. 115, 565-575, 1991
A;Title: Expression of two nonallelic type II procollagen genes during Xenopus laevis emitaterence number: A40333; MUID:92011898; PMID:1918153
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            A; Molecule type: mRNA

Campbell B.G., Wootton J.A.M., MacLeod J.N., Minor R.R.;
Sequence of normal canine CCLIA1 cDNA and identification of a heterozygous alphal(I) collagen Gly208Ala mutation in a severe case of canine osteogenesis imperfecta.";
Arch. Biochem. Biophys. 384:37-46(2000).
I- FUNCTION: Type I collagen is a member of group I collagen
(fibrillar forming collagen).
I- SUBUNIT: Triners of one alpha 2(I) and two alpha 1(I) chains.
I- FTW. Prolines at the third position of the tripeptide repeating unit (G-X-Y) are hydroxylated in some or all of the chains.
I- DYR. Prolines at the collagen of a cause of osteogenesis imperfecta
                                                                                                                                                                                                                                                                                                                                                                                     Canis familiaris (Dog).

"Nucleotide sequence of a collagen cDNA-fragment coding for the carboxyl end of pro alpha 1(1)-chains.";
FEBS Lett. 11:61-65(1980).
-!- FUNCTION: Type I collagen is a member of group I collagen (fibrillar forming collagen).
-!- SUBUNT Trimers of one alpha 2(I) and two alpha 1(I) chains.
-!- TISSUE SPECIFICTY: Forms the fibrils of tendon, ligaments and bones. In bones the fibrils are mineralized with calcium
                                                                                                                                   NUCLEOTIDE SEQUENCE OF 981-1453.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      hydroxyapatite.
PTM: Proline residues at the third position of the tripoptide PTM: Proline residues at the third position of the tripoptide chains. Pro-1153 is the only 3-hydroxypro and the only hydroxylated proline in position X.
SIMILARITY: Belongs to the fibrillar collagen family.
SIMILARITY: Concains 1 VWPC domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             PROSITE; PSO1208; VWFC_1; 1.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   -I- PTM: Prolines at the third position of the tripeptide repeating unit (G-X-Y) are hydroxylated in some or all of the chains.
-I- SIMILARITY: Belongs to the fibrillar collagen family.
-I- SIMILARITY: Contains 1 WWFC domain.
-I- CAUTION: Ref. 3 sequence differs from that shown due to erroneous gene model prediction.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         NUCLECTIDE SEQUENCE OF 1-25.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 21, Requence 18, Reque
